Practice and Realization-Nathan Rotenstreich 2012-12-06 The present book is an exploration of some basic issues of Kant’s moral philosophy. The point of departure is the concept of freedom and the self-legislation of reason. Since self-legislation is expressed in the sphere of practice or morality, it is meant to overcome some of the vulnerable aspects of Kant’s theoretical philosophy, namely that which Kant himself pointed to and called the ‘lucky chance,’ in so far as the application of reason to sensuous data is concerned. The book attempts to show that Kant’s practical or moral philosophy faces questions which are parallel to those he faced in the sphere of his theoretical philosophy. The problematic situation of realization of practice is parallel to the problematic situation of application of theory. It is in the line of the problems emerging from Kant’s practical philosophy that the present book deals with some of Kant’s minor writings, or less-known ones, including his writings in the sphere of politics, history and education. The limitations of self-legislation - this is the theme of the book. The book is parallel to the author’s previous one on Kant: ‘Experience and its Systematization - Studies in Kant” (Nijhoff, 1965, 2nd edition 1973), as well as to: “From Substance to Subject -Studies in Hegel” (Nijhoff, 1974). Jerusalem 1978 ABBREVIATIONS As to the references to Kant’s major works, the following procedure will be observed: Kritik der reinen Vernunft will be quoted as Kr. d. r. V.

Reading Aristotle’s Ethics-Aristide Tessitore 1996-01-01 Presents the Nicomachean Ethics as a work of political philosophy, emphasizing the interplay between its practical political concerns and its underlying philosophic perspective and arguing that it is rhetorical in the precise Aristotelian meaning of the term.

Action, Contemplation, and Happiness-C. D. C. Reeve 2012-03-12 "The notion of practical wisdom is one of Aristotle’s greatest inventions. It has inspired philosophers as diverse as Martin Heidegger, Hans-Georg Gadamer, Elizabeth Anscombe, Michael Thompson, and John McDowell. Now a leading scholar of ancient philosophy offers a challenge to received accounts of practical wisdom by situating it in the larger context of Aristotle’s views on knowledge and reality. That happiness is the end pursued by practical wisdom is commonly agreed. What is disputed is whether happiness is to be found in the practical life of political action, in which we exhibit courage, temperance, and other virtues of character, or in the contemplative life, where theoretical wisdom is the essential virtue. C.D.C. Reeve argues that the dichotomy is bogus, that these lives are in fact parts of a single life, which is the best human one. In support of this view, he develops innovative accounts of many of the central notions in Aristotle’s metaphysics, epistemology, and psychology, including matter and form, scientific knowledge, dialectic, educatedness, perception, understanding, political science, practical truth, deliberation, and deliberate choice. These accounts are based directly on freshly translated passages from many of Aristotle’s writings. Action, Contemplation, and Happiness is an accessible essay not just on practical wisdom but on Aristotle’s philosophy as a whole.”--book jacket.

Emotional Well-Being in Educational Policy and Practice-Kathryn Ecclestone 2017-07-05 Schools in numerous countries around the world have become key sites for interventions designed to enhance the emotional well-being of children and young people, offering new forms of pedagogy and curriculum knowledge informed in ad hoc and eclectic ways by various strands of psychology, counselling and therapy. Responding to C. Wright Mills’ famous injunction for a sociological imagination, this unique inter-disciplinary collection of papers explores ideologies and imperatives that frame contemporary education policy and practice around emotional well-being, ideas and assumptions about the state of childhood today, and the changing nature of the curriculum subject and associated forms of knowledge. In bringing together British and American advocates of behavioural interventions in social and emotional learning alongside critics who draw on historical, philosophical and sociological perspectives, it highlights new and important debates for policy makers, the designers, implementers and evaluators of interventions and those who participate in them. This book was originally published as a special issue of Research Papers in Education.

Ethics-Stephen Everson 1998-05-04 This collection of essays provides a sophisticated and accessible introduction to the moral theories of the ancient world. Aristotle on the Apparent Good-Jessica Moss 2012-07-19 Aristotle holds that we desire things because they appear good to us—a view still dominant in philosophy now. But what is it for something to appear good? Why does pleasure in particular tend to appear good, as Aristotle holds? And how do appearances of goodness motivate desire and action? No sustained study of Aristotle has addressed these questions, or even recognized them as worth asking. Jessica Moss argues that the notion of the apparent good is crucial to understanding both Aristotle’s psychological theory and his ethics, and the relation between them. Beginning from the parallels Aristotle draws between appearances of things as good and ordinary perceptual appearances such as those involved in optical illusion, Moss argues that on Aristotle’s view things appear good to us, just as things appear round or small, in virtue of a psychological capacity responsible for quasi-perceptual phenomena like dreams and visualization: phantasia (‘imagination’). Once we realize that the appearances of goodness which play so major a role in Aristotle’s ethics are literal quasi-perceptual appearances, Moss suggests we can use his detailed accounts of phantasia and its relation to perception and thought to gain new insight into some of the most debated areas of Aristotle’s philosophy: his accounts of emotions, akrasia, ethical habituation, character, deliberation, and desire. In Aristotle on the Apparent Good, Moss presents a new—and controversial—interpretation of Aristotle’s moral psychology: one which greatly restricts the role of reason in ethical matters, and gives an absolutely central role to pleasure.

Aristotle on the Human Good-Richard Kraut 2021-02-09 Aristotle’s Nicomachean Ethics, which equates the ultimate end of human life with happiness (eudaimonia), is thought by many readers to argue that this highest goal consists in the largest possible aggregate of intrinsic goods. Richard Kraut proposes instead that Aristotle identifies happiness with only one type of good: excellent activity of the rational soul. In defense of this reading, Kraut discusses Aristotle’s attempt to organize all human goods into a single structure, so that each subordinate end is desirable for the sake of some higher goal. This book also emphasizes the philosopher’s hierarchy of natural kinds, in which every type of creature achieves its good by imitating divine life. As Kraut argues, Aristotle’s belief that thinking is the sole activity of the gods leads him to an intellectualist conception of the ethical virtues. Aristotle values these traits because, by subordinating emotion to reason, they enhance our ability to lead a life devoted to philosophy or politics.

Ministers of the Law-Jean Porter 2010-10-22 "Ministers of the Law is an argument for the importance of the history of Western legal thought for the jurisprudence of political authority. Jean Porter demonstrates that European jurists before the age of legal positivism had placed clear and absolute boundaries on the authority and power of rulers and magistrates. These boundaries were defined by the rights of human beings that transcended the ‘rule of law’ and constitutions.–Kenneth Pennington Catholic University of America This book is a theological account of a vital element of human flourishing: authority-natural, political, and legal. Porter argues that positive law, national and international, possesses an authority that may trump anti-terrorist expedients and even general humanitarian considerations.–Nigel Biggar University of Oxford The author presents an original account of natural law as a ‘basis of legitimization’ that can validate a variety of political systems and structures of positive law.”-Brian Tierney Cornell University

The Pursuit of Happiness-Sarah Heaner Lancaster 2010-12-08 People want to be happy. Nothing could be more obvious, and yet this common and evident goal is not as easy to achieve as it is to desire. The Christian tradition has understood happiness to be gained through relationship with God, and it has much to say about what will make us truly happy and what will not. This book examines happiness from a Christian perspective, using John Wesley as the focus of study because he understood happiness with God to be the very goal of Christian life. He also understood that Christian happiness needed to acknowledge the difficulties of life. This book seeks to learn from the wisdom of the past in order to imagine how Christians today might talk about happiness in a way that is faithful to the tradition and engages the world as well.

Family theme parks, happiness and children’s consumption: From roller-coasters to Pippi Longstocking-David Cardell 2016-09-24 This book provides an ethnographic contribution to research on children’s consumption, family life and happiness. Various and shifting notions of happiness are explored, as well as conditions for and challenges to happiness, through an analysis of video-recorded interviews and mobile ethnography conducted in two of the most popular theme parks in Sweden. Initially, the study outlines how previous research has conceptualized happiness in association with time and place in a rather static way. Based on a treatise of notions of happiness in philosophy and the social sciences, there is a turn in this thesis towards practice. It generates fundamental knowledge about the complexity of happiness. By employing this approach, it is possible to highlight how happiness is enacted as part of and in relation to ideals of family life, time, childhood, money, consumption, experiences and material things. As we explore the practices of children and their families, we discover that shifting meanings of happiness are located in contemporary culture, where emotions and consumption are of central importance. The approach is interdisciplinary, and draws on theoretical and methodological contributions in sociology, anthropology and Science and Technology Studies (STS). Notions of meshwork and enactment become important for the exploration of happiness as a complex and changing matter, which productively involves social relations and material things. Throughout the thesis there is a dialogue with previous research on happiness, consumption and childhood which highlights the importance of exploring messy practices, in movement. It is argued that explorations of practice contribute to a critical understanding of how happiness and contemporary ideals of childhood can be approached – through consumption and as part of citizenship in a consumer society where happiness is of central importance. Abstract [sv] Denna avhandling utgör ett etnografiskt bidrag till forskning om barns konsumtion, familjeliv och lycka. Genom en analys av videoinspelade intervjuer samt familjesök till två av Sveriges mest välbesökta temaparker utforskas skiftande betydelse av lycka, liksom dess förutsättningar och utmaningar. Tidigare temaparks-forskning har generellt tagit lyckans existens för given. Utifrån en inledande diskussion om bland annat olika filosofiska och samhällsvetenskapliga lycketeorier argumenterar avhandlingen för att studier av praktik tillför ny och grundläggande kunskap om lyckans komplexa sammansättningar. Avhandlingen visar därigenom att lycka iscensätts som en del av - och i förhållande till - ideal om familjeliv, tid, barndom, pengar, konsumtion, upplevelser och materiella ting. Genom att fokusera på barn och deras familjers praktiker lokaliserar lyckans skiftande betydelser i en samtidskultur där emotioner och konsumtion är centrala. Avhandlingens ansats är tvärvetenskaplig och hämtar teoretisk och metodologisk inspiration från sociologi, antropologi samt teknik- och vetenskapsstudier (STS). Genom denna ansats synliggörs sammanflätningar av sociala relationer och materiella ting som produktiva i iscensättandet av lycka. Genom en dialog mellan empiriska beskrivningar och forskning om lycka, konsumtion och barndom belyser avhandlingen nödvändigheten av att synliggöra och utforska rörliga och rörliga praktiker. Det bidrar till en kritisk förståelse av praktik som kan förändra hur vi närmar oss lycka och samtida barndomsideal - som konsumenter och medborgare i ett lyckosträvande konsumtionssamhälle.

Oxford Handbook of Happiness-Susan David 2012-12-27 In recent decades there has been a shift in focus from psychological and social problems-what might be called the “dark side” of humanity-to human well-being and flourishing. The Positive Psychology movement, along with changes in attitudes toward organisational and societal health, has generated a surge of interest in human happiness. The Oxford Handbook of Happiness is the definitive text for researchers and practitioners interested in human happiness. Its editors and chapter contributors are world leaders in the investigation of happiness across the fields of psychology, organizational behaviour, education, philosophy, social policy and economics. The study of happiness is at the nexus of four major scientific developments: the growing field of Positive Psychology which researches the conditions that make people flourish; advances in the biological and affective sciences which have contributed to the understanding of positive emotions; Positive Organizational Scholarship, an emerging discipline aimed at investigating and fostering excellence in organisations; and findings from economics indicating that traditional markers of economic and societal well-being are insufficient. The Oxford Handbook of Happiness offers readers a coherent, multi-disciplinary, and accessible text on the current state-of-the-art in happiness research. This volume features ten sections that focus on psychological, philosophical, evolutionary, economic and spiritual approaches to happiness; happiness in society, education, organisations and relationships; and the assessment and development of happiness. Readers will find information on psychological constructs such as resilience, flow, and emotional intelligence; theories including broaden-and-build and self-determination; and explorations of topics including collective virtuosity, psychological capital, coaching, environmental sustainability and economic growth. This handbook will be useful to academics, practitioners, teachers, students, and all those interested in theory and research on human happiness.

Nicomachean Ethics-Aristotle 2014-02-26 An excellent new translation and commentary. It will serve newcomers as an informative, accessible introduction to the Nicomachean Ethics and to many issues in Aristotle’s philosophy, but also has much to offer advanced scholars. The commentary is noteworthy for its frequent citations of relevant passages from other works in Aristotle’s corpus, which often shed new light on the texts. Reeve’s translation is meticulous: it hits the virtuous mean—accurate and technical, yet readable—between translation’s vicious extremes of faithlessness and indigestibility.--Jessica Moss, New York University

Discover Yourself, Discover Happiness-Eva Stanova 2013-05 This book is Eva Stanová’s personal story, her journey through life. The most difficult thing that has happened to her in her life--divorce--also brought about the best things. She discovered her own lifestyle--the happiness lifestyle. Maybe all that is needed is a change of viewpoint and an understanding that if two people are not headed in the same direction, it might be time to part ways. Peacefully, lovingly, and with nothing but the best wishes for the other person. Stanová wrote this story for those who are looking for happiness, searching for it themselves, or those trying to deal with their relationships. She also wrote it for herself, to close a chapter of her life and assess its worth. She writes about her experiences, wins and losses, and maybe through them you will realize what you want and don’t want in your life and those things that influence us in life. Sometimes it can be some small thing, and sometimes something more serious, that will be reflected in our subconscious. This negative information about ourselves then influences us on our journey through life and will trap us in certain models of behavior. Her story is about searching for her own path. Despite being divorced, she is fully supportive of the family life, and that it is an arena of freedom. What do you think gives us freedom?

Feminism in Practice-Karen A. Foss 2021-09-23 Feminism in Practice uses feminism as a blueprint for exploring change strategies. It features twenty contemporary feminists from diverse arenas, including activists, comedians, musicians, politicians, poets, and showrunners. The women come to life through line drawings, brief biographies, extensive quotations, their definitions of feminism, and the change strategies they employ. Questions for reflection encourage readers to think through their own relationship to feminism and change. Chapter 1 defines feminism, raising issues with the typical definition of feminism as the effort to achieve equality between women and men. It concludes with a description of over twenty types of feminism. Chapter 2 describes the triggering events, happening places, and key ideas of the four waves of feminism. The opening chapters provide a comprehensive understanding of the diversity and complexity of feminist movement. The book is organized around five primary objectives that animate contemporary change efforts—proclaiming identity, naming a problem, enriching a system, changing a system, and creating an alternative system. Each objective is developed through

theoretical assumptions and twelve change strategies that show it at work in feminist movement. Feminism in Practice also serves as a practical handbook that readers can use to experiment with the strategies and expand their toolkits for creating change in their lives and worlds. The authors are uniquely qualified to explore issues of feminism and change. Karen Foss and Sonja Foss are second wave feminists who have written extensively on alternative change strategies, feminist communication, and feminist theory. Alena Ruggerio brings to the project the standpoint of a third wave feminist at home in pop culture. Her scholarship lies at the intersection of rhetoric, feminism, and religious studies. To learn more about Feminism in Practice, listen to the authors' October 2021 interview on The Jefferson Exchange.

Happiness for Humans-Daniel C. Russell 2012-10-25 In Happiness for Humans, Daniel C. Russell takes a fresh look at happiness from a practical perspective: the perspective of someone trying to solve the wonderful problem of how to give himself a good life. From this perspective, 'happiness' is the name of a solution to that problem for practical deliberation. Russell's approach to happiness falls within a tradition that reaches back to ancient Greek and Roman philosophers—a tradition now called 'eudaimonism.' Beginning with Aristotle's seminal discussion of the role of happiness in practical reasoning, Russell asks what sort of good happiness would have to be in order to play the role in our practical economies that it actually does play. Looking at happiness from this perspective, Russell argues that happiness is a life of activity, with three main features: it is acting for the sake of ends we can live for, and living for them wisely; it is fulfilling for us, both as humans and as unique individuals; and it is inextricable from our connections with the particular persons, pursuits, and places that make us who we are. By returning to this ancient perspective on happiness, Russell finds new directions for contemporary thought about the good lives we want for ourselves.

Alfarabi and the Foundation of Islamic Political Philosophy-Muhsin S. Mahdi 2020-05-21 In this work, Muhsin Mahdi—widely regarded as the preeminent scholar of Islamic political thought—distills more than four decades of research to offer an authoritative analysis of the work of Alfarabi, the founder of Islamic political philosophy. Mahdi, who also brought to light writings of Alfarabi that had long been presumed lost or were not even known, presents this great thinker as his contemporaries would have seen him: as a philosopher who sought to lay the foundations for a new understanding of revealed religion and its relation to the tradition of political philosophy. Beginning with a survey of Islamic philosophy and a discussion of its historical background, Mahdi considers the interrelated spheres of philosophy, political thought, theology, and jurisprudence of the time. He then turns to Alfarabi's concept of "the virtuous city," and concludes with an in-depth analysis of the trilogy, Philosophy of Plato and Aristotle. This philosophical engagement with the writings of and about Alfarabi will be essential reading for anyone interested in medieval political philosophy.

A Philosophy of Human Hope-J.J. Godfrey 2012-12-06 Few reference works in philosophy have articles on hope. Few also are systematic or large-scale philosophical studies of hope. Hope is admitted to be important in people's lives, but as a topic for study, hope has largely been left to psychologists and theologians. For the most part philosophers treat hope en passant. My aim is to outline a general theory of hope, to explore its structure, forms, goals, reasonableness, and implications, and to trace the implications of such a theory for atheism or theism. What has been written is quite disparate. Some see hope in an individualistic, often existential, way, and some in a social and political way. Hope is proposed by some as essentially atheistic, and by others as incomprehensible outside of one or another kind of theism. Is it possible to think consistently and at the same time comprehensively about the phenomenon of human hoping? Or is it several phenomena? How could there be such diverse understandings of so central a human experience? On what rational basis could people differ over whether hope is linked to God? What I offer here is a systematic analysis, but one worked out in dialogue with Ernst Bloch, Immanuel Kant, and Gabriel Marcel. Ernst Bloch of course was a Marxist and officially an atheist, Gabriel Marcel a Christian theist, and Immanuel Kant was a theist, but not in a conventional way.

Positive Psychology in Practice-P. Power and Politics in Sustainable Consumption Research and Practice-Cindy Isenhour 2019-03-04 With growing awareness of environmental deterioration, atmospheric pollution and resource depletion, the last several decades have brought increased attention and scrutiny to global consumption levels. However, there are significant and well documented limitations associated with current efforts to encourage more sustainable consumption patterns, ranging from informational and time constraints to the highly individualizing effect of market-based participation. This volume, featuring essays solicited from experts engaged in sustainable consumption research from around the world, presents empirical and theoretical illustrations of the various means through which politics and power influence (un)sustainable consumption practices, policies and perspectives. With chapters on compelling topics including collective action, behaviour-change and the transition movement, the authors discuss why current efforts have largely failed to meet environmental targets and explore promising directions for research, policy and practice. Featuring contributions that will help the reader open up politics and power in ways that are accessible and productive and bridge the gaps with current approaches to sustainable consumption, this book will be of great interest to students and scholars of sustainable consumption and the politics of sustainability.
