Interventions With Families Of Gay, Lesbian, Bisexual, And Transgender People: From The Inside Out

Interventions with Families of Gay, Lesbian, Bisexual, and Transgender People-Jerry J. Bigner 2006 Multiple perspectives for more in-depth personal and professional knowledge Though much literature is devoted to treating GLBTQ individuals, relatively little has focused on working with their family members. *Interventions with Families of Gay, Lesbian, Bisexual, and Transgender People: From the Inside Out* presents ten first-hand, in-depth personal and professional perspectives by educators, researchers, administrators, and practitioners discussing various ways of working with families of GLBT individuals. This valuable reference explores the latest research and current innovative therapeutic approaches to work effectively with this unique population. *Interventions with Families of Gay, Lesbian, Bisexual, and Transgender People: From the Inside Out* relies on the “inside out” experiences of professionals from multiple disciplines, showing us different ways of addressing their very special needs. The text focuses on working deeply with people through understanding their very particular situations and building whatever help they want around them. Broadly, the articles highlight the origins of our national family support groups, research, supervision, and the different models of treatment—individual, couple, and family. More specifically, discussions explore therapist training, effective resolution of conflict, loss for those mothers whose daughters now identify as transgender, the adoption of an ally identity, heterosexual bias in treatment, and various approaches for transgender clients, their partners and family members. Specific topics in *Interventions with Families of Gay, Lesbian, Bisexual, and Transgender People: From the Inside Out* include: systemic therapeutic approaches the beginnings and growth of support groups a qualitative study on mothers of transgender sons research on gay and lesbian stepparenting—highlighting the need to view the relationships beyond a heterosexist focus Sexual Orientation Matrix for Supervision (SOMS) as a starting point to begin examining attitudes, beliefs, skills and behaviors of both supervisor and trainee an interview with two sexologists, who insist that treatment with trans children and adolescents must be both family- and community-focused historical and therapeutic perspectives on working with transgender people, including the development of therapeutic models a moving personal account of a clinician grappling with her own uncertainties as she journeys her way through treatment with a young transgender client *Interventions with Families of Gay, Lesbian, Bisexual, and Transgender People: From the Inside Out* is a flexible and useful classroom text and reference for educators and students at every level, psychiatrists, psychologists, and social workers.

Coming Out, Coming Home-Michael C. LaSala 2010 The discovery that a child is lesbian or gay can send shockwaves through a family. A mother will question how she's raised her son; a father will worry that his daughter will experience discrimination. From the child's perspective, gay and lesbian youth fear their families will reject them and that they will lose financial and emotional support. All in all, learning a child is gay challenges long-held views about sexuality and relationships, and the resulting uncertainty can produce feelings of anger, resentment, and concern. Through a qualitative, multicultural study of sixty-five gay and lesbian children and their parents, Michael LaSala, a leading expert on this issue, outlines effective, practice-tested interventions for families in transition. His research reveals surprising outcomes, such as learning that a child is homosexual can improve familial relationships, including father-child relationships, even if a parent reacts strongly or negatively to the revelation. By confronting feelings of depression, anxiety, and grief head on, LaSala formulates the best approach for practitioners who hope to reestablish intimacy among family members and preserve family connections?as well as individual autonomy?well into the child's maturation. By restricting his study to parents and children of the same family, LaSala accurately captures the reciprocal effects of family interactions, identifying them as targets for effective treatment. *Coming Out, Coming Home* is also a valuable text for families, enabling adjustment through relatable scenarios and analyses.

Handbook of LGBT-Affirmative Couple and Family Therapy-Jerry J. Bigner 2012-05-04 The editors and contributors of this comprehensive text provide a unique and important contribution to LGBT clinical literature. Spanning 30 chapters, they discuss the diverse and complex issues involved in LGBT couple and family therapy. In almost 15 years, this book provides the first in-depth overview of the best practices for therapists and those in training who wish to work effectively with LGBT clients, couples, and families need to know, and is only the second of its kind in the history of the field. The clinical issues discussed include • raising LGBT children • coming out • elderly LGBT issues • sex therapy • ethical and training issues Because of the breadth of the book, its specificity, and the expertise of the contributing authors and editors, it is the definitive handbook on LGBT couple and family therapy.

101 More Interventions in Family Therapy-Thorana S Nelson 2014-07-16 Inside 101 More Interventions in Family Therapy, you'll discover many revolutionary and flexible strategies for family counseling intervention that you can tailor, amend, and apply in your own practice. Designed to appeal to professionals of beginning, intermediate, or advanced level status, 101 More Interventions in Family Therapy caters to an even broader range of ethnic, racial, gender, and class contexts than did its well-received predecessor, 101 Interventions in Family Therapy. You'll also find that this volume encompasses a wider variety of family therapy orientations, including strategic, behavioral, family of origin, solution-focused, and narrative. In 101 More Interventions in Family Therapy, you'll have at your fingertips a collection of favorite, tried-and-true interventions compiled, revised, and delivered to you by the professionals who use them--the clinicians themselves. You'll gain valuable insight into: effective and useful assessment strategies therapy that addresses school and career problems questions to use in solution-focused therapy questions to use in narrative therapy ideas for resolving intergenerational issues Too often, the in-the-trenches accounts you need to help add variety and a high success rate to your own practice come to you piecemeal in journals or newsletters. But in 101 More Interventions in Family Therapy, you'll find 101 handy, easy-to-read, and fun ways to modify your own therapeutic styles for a truly diverse variety of clientele and settings right where you want them--in one volume, in one place. Even after a few chapters, you'll discover 101 reasons to be happy with the prospect of improving your practice. Specifically, some of the interesting tips and techniques you'll read about include: applying theater techniques to family therapy using an alarm clock and rubber band as props in clinical practice with children, couples, and families utilizing the “play baby” intervention to coach parents on ways to address their child(ren)'s concerns adopting a “Columbo therapy” approach—one in which the therapist acts confused and asks questions out of a genuine curiosity about the client's experience--to take a one-down position with clients creating a safe space in therapy and helping clients transfer it into their lives using homework to increase the likelihood of producing desired therapeutic outcomes

Examining Correlates of Psychosocial Adjustment Among Children in Gay and Lesbian Families and Interventions to Address the Problem-Jamie Ann Acero Bacosa 2017 This thesis project aims to examine risk factors involved in the psychosocial adjustment among children in gay and lesbian families and the interventions used to address negative outcomes. Two research questions guide this paper: 1) What factors correlated with or related to the psychosocial adjustment among children in gay and lesbian families? and 2) What effect do school-based policies, in comparison to gay-straight alliances, have on the psychosocial adjustment of children in same-sex families? By employing various methodologies that focused on a range of psychosocial adjustment factors for children with same-sex parents and LGBT youth, 45 peer-reviewed studies were found to contribute to this project. Findings revealed that stigmatization, peer victimization, and heterosexism were salient to participants, especially in the school setting. Gay-straight alliances (GSAs) and school-based policies were found to alleviate negative adjustment. Given the findings, suggestions are made with the respect to future research that is needed to address this vital topic.

An Introduction to Marriage and Family Therapy-Joseph L. Wetchler 2014-08-27 Now in its second edition, this text introduces readers to the rich history and practice of Marriage and Family Therapy, with 32 professionals from across the US presenting their knowledge in their areas of expertise. This blend of approaches and styles gives this text a unique voice and makes it a comprehensive resource for graduate students taking their first course in Marriage and Family Therapy. The book is divided into three sections: Part 1 focuses on the components on which 21st century family therapy is based and summarizes the most recent changes made to not only therapeutic interventions, but to the very concept of “family.” Part 2 presents an overview of the 7 major theoretical models of the field: structural, strategic, Milan, social constructionist, experiential, transgenerational, and cognitive-behavioral family therapy. Each chapter in this section • Focuses on the founder of the theory, its theoretical tenants, and its key techniques • Shows how the model focuses on diversity • Presents the research that supports the approach Part 3 addresses specific treatment areas that are common to marriage and family therapists, such as sex therapy, pre-marital therapy, research, and ethics and legal issues. As an introduction to the field of Marriage and Family Therapy, this volume stands above the rest. Not only will readers gain an understanding of the rich history of the field and its techniques, but they will also see a complete picture of the context in which families are embedded, such as gender, culture, spirituality, and sexual orientation. This knowledge is the key to understanding what differentiates Marriage and Family Therapy from individual psychotherapy. Glossaries, case studies, tables, figures, and appendices appear generously throughout the text to present this information and give students a thorough overview to prepare them for their professional lives.

Systemic Family Therapy-Jon L. Winek 2009-07-27 This text looks at theoretical issues in the context of their clinical applications. The gap between theoretical and applied understanding in Marriage and Family Therapy is bridged by several features unique to this text. The text is enriched with graphic representations of key theoretical constructs as well as several tables. The book utilizes clinical examples throughout the chapters to help illustrate how theoretical constructs work in practice.

On the Meaning of Friendship Between Gay Men-Andrew R. Gottlieb 2010-05-26

Becoming Parent-Damien W. Riggs 2007-01-01 Damien invites us to find different ways of responding to myths about lesbian and gay parenting. Damien shows us how myths, and psychologists' responses to them, function to uphold dominant values about parenting and families. He provides us with tools to take these myths apart and challenge the fears that drive many public (and private) discussions about our parenting. In this book, most importantly, he offers a language with which to change the conversation about lesbian and gay parenting. Damien, like most psychologists who write about and research lesbian and gay parenting, is concerned with creating a better world, but he asks us to pause and reflect on the strategies we use to bring about a better world and to question what exactly that world might look like. Clearly there are still many lesbians and gay men whose fitness to parent is called into question and some are likely to be helped by interventions that aim to counter myths and misconceptions about lesbian and gay parenting.

A Closer Look at Gay and Lesbian Families-Anna Elizabeth Feliciano 2009

Stepfamily Relationships-Lawrence Ganong 2016-07-15 This second edition synthesizes the emerging knowledge base on the diversity of stepfamilies, their inherent concerns, and why so relatively little is still known about them. Its extensive findings shed needed light on family arrangements relatively new to the literature (e.g., cohabitating stepparents), the effects of these relationships on different family members (e.g., stepsiblings, stepgrandparents), the experiences of gay and lesbian stepfamilies, and the stigma against non-nuclear families. Coverage reviews effective therapeutic and counseling interventions for emotional, familial, and social challenges of stepfamilies, as well as the merits of family education and self-help programs. The authors explore prevailing myths about marriage, divorce, and stepfamily life while expanding the limits of stepfamily research. Among the topics included: • The cultural context of stepfamilies. • Couple dynamics in stepfamilies. • Gay and lesbian couples in stepfamilies. • The dynamics of stepparenting. • Siblings, half-siblings, and stepsiblings. • Effects of stepfamily living on children. • Clinical perspectives on stepfamily dynamics. For researchers and clinicians who work with families, it enriches the literature as it offers insights and guidelines for effective practice as well as possible avenues for future research.

Innovative Interventions To Reduce Dementia Caregiver Distress-David W. Coon, PhD 2002-10-31 Increasing evidence has demonstrated that caregivers of dementia victims are at risk for depression and other medical problems. In what ways can health care providers improve or maintain the well-being of dementia caregivers? This volume provides an overview of emerging themes in dementia caregiving research and presents a broad array of practical strategies for reducing caregiver distress, including interventions for specific populations such as ethnic minority caregivers, male caregivers, and caregivers with diverse sexual orientations. Innovative approaches include the value of partnering with primary care physicians to improve quality of life for both patient and caregiver and the use of technological advances to help distressed caregivers. A timely, cutting edge book written for clinicians of varying backgrounds who provide direct services to families of dementia victims. For Further Information, Please Click Here!

Casebook for Counseling-Sari H. Dworkin 2014-12-23 This captivating book contains 31 case studies that focus on what is said and done in actual counseling sessions with LGBTQQI clients, including diagnosis; interventions, treatment goals, and outcomes; transference and countertransference issues; other multicultural considerations; and recommendations for further counseling or training. Experts in the field address topics across the areas of individual development, relationship concerns, contextual matters, and wellness. The cases presented include coming out; counseling intersex, bisexual, and transsexual clients; couples, marriage, and family counseling; parenting issues; aging; working with rural clients and African American, Native American, Latino/a, Asian, and multiracial individuals; sexual minority youth; HIV; sexual and drug addictions; binational couples; work and career; domestic violence; spirituality and religion; sexual issues; and women's health *Requests for digital versions from ACA can be found on www.wiley.com. *To purchase print copies, please visit the ACA website *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org.

Handbook of Depression, Second Edition-Ian H. Gotlib 2008-10-23 Bringing together the field's leading authorities, this acclaimed work is widely regarded as the standard reference on depression. The Handbook provides comprehensive coverage of the epidemiology, course, and outcome of depressive disorders; issues in assessment and diagnosis; psychological and biological risk factors; effective approaches to prevention and treatment; and the nature of depression in specific populations. Each chapter offers a definitive statement of current theories, methods, and research findings, while also identifying key questions that remain unanswered.

Ethnicity and the Dementias-Gwen Yeo 2013-05-13 In recent years, the literature on the topic of ethnic and racial issues in Alzheimer's disease and other dementias has increased dramatically. At the same time, the need for cultural competence in all of geriatric care, including dementia care, is increasingly being acknowledged. Researchers and providers are beginning to recognize the impending "ethnogeriatric imperative," as the number of elders from diverse ethnic and cultural backgrounds continues to rise. Ethnicity and the Dementias offers invaluable background information in this area, while also examining how those suffering from dementia and their family members respond or adapt to the challenges that follow. Thoroughly updated and revised from the first edition, the book features contributions from leading clinicians and researchers on the epidemiology of dementias by ethnic population, new information on the assessment of diverse populations, and updates and inclusions of new populations in the management of dementia and working with families. The book is ideal for practitioners, researchers, and policy makers in search of the most current ethnogeriatric findings.

Social Work with Lesbian Parent Families-Lucy R Mercier 2013-10-18 The traditional concept of family as being exclusively heterosexual has resulted in myth-generation about lesbian parents as well as fostering limitations in the programs and benefits that support more diverse nontraditional families. *Social Work with Lesbian Parent Families: Ecological Perspectives* explores the variety of social systems with which lesbian parent families interact, with a focus on implications for improved, diversity-affirming service delivery and policy development. Unlike other literature on lesbian parent families, this revealing resource pulls together work on lesbian parenting from various researchers across a broad range of disciplines and presents this work from the ecosystems perspective so that the reader may view the experiences of lesbian parent families in a holistic way. The research goes beyond simple comparisons between lesbian and straight mothers. This useful text provides more complex research data, including both a more sophisticated view of the diverse communities in which lesbian parents are found, and more innovative ways of studying the issues relevant to social service providers. Developmental and life issues negotiated by lesbian parent families are discussed in detail using a strengths-based approach to intervention with individuals, families, small groups, communities, and larger systems. This unique book has the strong potential to influence the policies that impact lesbian parent families. *Social Work with Lesbian Parent Families: Ecological Perspectives* is a valuable resource for social workers, psychologists, sociologists, anthropologists, marriage and family therapists, public policy and administration professionals, students, and academics doing research on sexual orientation and family. This book was published as a special issue of the *Journal of Gay & Lesbian Social Services*.

Clinical Social Work Practice with Adult Lesbians: Oxford Bibliographies Online Research Guide-Oxford University Press 2010-05-01 This ebook is a selective guide designed to help scholars and students of social work find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In social work, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is a static version of an article from *Oxford Bibliographies Online: Social Work*, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study and practice of social work. *Oxford Bibliographies Online* covers most subject disciplines within the social science and humanities, for more information visit www.aboutobo.com.

Lesbian, Gay, and Bisexual Identities over the Lifespan-Anthony R. D'Augelli 1995-02-09 Over the last fifteen years, psychological research regarding sexual orientation has seen explosive growth. In this book, Anthony R. D'Augelli and Charlotte J. Patterson bring together top experts to offer a comprehensive overview of what we have discovered--and what we still need to learn--about lesbian, gay, and bisexual identities. Writing in clear, nontechnical language, the contributors cover a range of topics, including conceptions of sexual identity, development over the lifespan, family and other personal relationships, parenting, and bigotry and discrimination. *Lesbian, Gay, and Bisexual Identities Over the Lifespan* is essential reading for researchers, students, social scientists, mental health practitioners, and general readers who seek the most up-to-date and authoritative treatment of the subject available.

Social Work Practice with Children and Families-Francis K. O. Yuen 2014-06-11 Effectively engage clients in working for personal change *Social Work Practice with Children and Families* presents the framework for family health social work and its applications in various practice environments. This vital textbook provides a unique blend of academic deliberations and practical service guidelines. Case examples or discussion questions are included at the end of each chapter to facilitate more in-depth understanding and discussion among graduate and undergraduate students, professors, and educators in health and human service areas. *Social Work Practice with Children and Families* is organized into two major sections entitled "Practice Interventions" and "Policy, Programs, and Emerging Families." This book will supply you with intervention and change strategies for promoting the physical, mental, emotional, social, economic, cultural, and spiritual growth and development of the family unit and each of its members, resulting in its holistic well-being. The book covers a wide variety of family dynamics that you will encounter, including gay/lesbian parents, single parents, and grandparents as caregivers. In this resource, you will also find case studies, adaptive strategies, and intervention models for working with families dealing with: abuse and violence disability loss and grief HIV/AIDS migrating and seasonal farm work and more! *Social Work Practice with Children and Families* will show you how to adopt and use family health social work practice methodology and models in your casework. As a supplemental text, it will help you harness the resources of the household, the government, and the community to develop interventions and services that promote the interests and welfare of your clients and their loved ones.

Caregiving with Pride-Karen I. Fredriksen-Goldsen 2014-09-19 Groundbreaking information for caregivers—and those receiving care It is more common now than ever before for partners, family members, and friends to provide informal care, yet caregiving in the lesbian, gay, bisexual, and transgender (LGBT) communities has received little attention. *Caregiving with Pride* is the pioneering examination of caregiving experiences in the LGBT population. This important text also provides a frank discussion of the issues involved in needing and receiving care as well. Comprehensive and up-to-date, this both a timely account of an important field and practical information for implementing change. Unique in its focus and scope, *Caregiving with Pride* offers readers original research and new summaries and analyses of existing literature. With a wide-ranging approach that is both readable and enlightening, this essential collection recognizes the changing nature of families as central to the issues of caregiving and LGBT communities. It features articles that insist on and illustrate the importance of taking both identity issues and socio-cultural policy contexts of caregiving into account. While maintaining a multifaceted biopsychosocial perspective that is critical to understanding the varied aspects of this topic, contributors discuss: the prevalence of caregiving with LGBT communities health issues and the needs of those requiring care the unique risk and protective factors impacting HIV/AIDS caregivers the psychological effects - positive and negative - of caregiving family and personal - "chosen family" - relationships interactions with formal systems of health and long-term care effects of history and social stigma on those needing and giving care how current social policies impede LGBT people in their access to care the ways established medical guidelines hinder LGBT caregivers in their efforts to help existing interventions and opportunities to better serve these communities and much more! While *Caregiving with Pride* provides a detailed perspective of the current state of this often overlooked field, it also looks ahead and outlines a practical, useable blueprint for future research, services, and policies in marginalized communities. As an informative stand-alone resource, *Caregiving with Pride* is essential for gerontologists, sociologists, historians, social workers, psychologists, educators, researchers, and policy makers. In addition, this collection is ideal as a supplementary text for students of aging, women studies, GLBT studies, sociology, and health studies as well as the larger GLBT community.

Family Interventions in Domestic Violence-John Hamel, LCSW 2006-09-26 In this exciting new book John Hamel, author of the ground-breaking *Gender-Inclusive Treatment of Intimate Partner Abuse*, and Tonia Nicholls go beyond the traditional intervention theories of domestic violence practiced today. Offering alternative, unbiased and sometimes controversial views, theories, and current research, they, along with renowned contributors in the field, provide new treatment options that encompass a wide range of gender dynamics. Here are just some of the key principles covered: Interventions Should Be Based on a Thorough Unbiased Assessment Victim/Perpetrator Distinctions are Overstated, and Much Partner Abuse is Mutual Regardless of Perpetrator Gender, Child Witnesses to Partner Abuse are Adversely Affected, and are at Risk for Perpetrating Partner Abuse as Adults This new gender-inclusive approach to assessment and intervention provides a significant departure from traditional paradigms of domestic violence, and offers a much-needed awareness to effectively prevent violence in our communities today and for future generations.

Family Influences on Childhood Behavior and Development-Thomas P. Gullotta 2008-04-17 Irrespective of theoretical orientation, families matter. Families are the entity in which children are introduced to words, objects, shapes, and colors. Families are the people related in a myriad of conventional and unconventional ways that clothe, bathe, and feed its biological and acquired offspring. Influenced by race, ethnicity, income, and education, families relate not only to each other within the unit but to others in the neighborhood, the community, and beyond. This book is about families and their children. This book is about those times when the family unit experiences distress. This distress may be found in the serious illness of a child or a parent. It may be the result of a reconfiguration of the family as in divorce and remarriage. Or it may involve the harming of a family member sexually or physically. In this volume, the authors explore what family means today, what functions it serves, and those circumstances that can make family life painful. Importantly, the authors provide readers with clearly written information drawn from the most recent scientific investigations suggesting how the topics in this volume might be addressed to either ease that discomfort (treatment) or prevent its occurrence.

At Risk Youth-J. Jeffries McWhirter 2012-02-15 This text provides the conceptual and practical information on key issues and problems that students need to prepare effectively for work with at-risk youth. The authors describe and discuss the latest prevention and intervention techniques that will help future and current professionals perform their jobs successfully and improve the lives of young people at risk. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Handbook of Family Development and Intervention-William C. Nichols 2000-02-25 Like all complex living systems, a family, during its life course, proceeds through predictable stages of development. Yet every family is different, its uniqueness defined and continually redefined by an open-ended array of structural, biological, and sociocultural variables. And, as

with all living things, a family's continued well-being depends upon its ability to adapt to changes arising from both within the family system and without. First postulated in the 1940s, these basic ideas constitute the conceptual core of modern family development theory. From them has blossomed an impressive body of knowledge about family health and illness, without which much of the progress occurring in family therapy over the past half-century would not have been possible. This book does much to promote continued progress in the practical application of family development theory by affording family therapists an unparalleled opportunity to acquaint themselves with the most important trends in family development theory to emerge over the past decade. In it you will find contributions from leading theorists, researchers, and clinicians, arranged so as to provide a systematic treatment of the latest thinking on family development seen from both the systemic viewpoint and that of individual members of the system. Comprehensive in scope, this book explores the patterns, processes, and dynamics inherent in "traditional" families, as well as in important structural variants such as single-parent and gay and lesbian families and families with special needs and problems, including divorce, physical abuse, and disabilities. Since progress in the social sciences is as much about formulating viable new ways of seeing as it is about determining quantifiable facts, the editors offer equal time to an array of influential and sometimes radically conflicting schools of thought, including sociobiology, social psychology, constructionism, multiculturalism, postmodernism, and feminism. Mainstream family therapists will find much in this handbook that they will consider controversial. In some cases readers may even be outraged by the views expressed. Yet, thanks to the high caliber of scholarship, intellect, and professionalism evidenced throughout, none of the ideas advanced in Handbook of Family Development and Intervention can be easily dismissed, and all have something of value to offer the thoughtful, dedicated family therapist. Handbook of Family Development and Intervention is a valuable professional resource for all couples and family therapists. It is also must reading for graduate students in family psychology, family therapy, social work, and counseling. "In this magnificent volume, the editors make a major contribution that integrates individual and family development concepts and therapeutic applications by bringing together scholarly yet fresh contributions. The inclusion of various family forms and of families with special needs makes this volume especially relevant to the treatment of contemporary families as we enter the new millennium. This superb Handbook should be mandatory reading and an excellent reference for teachers, researchers, and therapists at all levels of development." Celia J. Falicov, PhD President, 1999 2001 American Family Therapy Academy

The School Services Sourcebook, Second Edition-Cynthia Franklin 2012-11-27 The School Services Sourcebook covers every aspect of school service delivery, arming practitioners with the nuts and bolts of evidence-based practice. The second edition has been significantly revised with a new structure including 73 chapters divided into five Parts across thirteen Sections, with an additional six chapters included in an online section found on the book's companion website. Fifteen new chapters cover key topics such as implementing an RTI framework, positive behavioral supports, school climate, functional behavioral assessment, the integration of ethics, Autism and suicide, school engagement, military families, Latino immigrant families, classroom management, transition planning and several chapters that speak to assessment and accountability. Each chapter serves as a detailed intervention map, quickly summarizing the problem area before presenting step-by-step instructions on how to implement an evidence-based program with clear goals in mind and methods to measure the outcome. The concise, user-friendly format from the first edition has been retained, orienting readers to each issue with a Getting Started section, then moves smoothly into What We Know, What We Can Do, Tools and Practice Examples, and Key Points to Remember. A new section, Applying Interventions within Response-to-Intervention Framework, has been added to each chapter to facilitate the implementation of an RTI model. Quick-reference tables and charts highlight the most important information needed for daily reference, and annotated lists of further reading and Web resources guide readers in gathering additional information to tailor their practice to suit their students' needs. Each chapter has been specifically crafted by leaders in their fields with the ultimate goal of giving school-based practitioners the tools they need to deliver the best mental health and social services possible to students, families, and communities. This sourcebook is an invaluable reference for all school-based social workers, psychologists, counselors, mental health professionals, educators, and administrators. Visit the companion website for more information and to access additional book content: [URL]

Handbook of Evidence-Based Mental Health Practice with Sexual and Gender Minorities-John E. Pachankis 2019-04-01 Historically, mental health clinical research has taken inadequate account of psychosocial disorders experienced by those who identify as sexual and gender minorities, however, researchers have recently begun developing and adapting evidence-based mental health treatment approaches for use with these groups. Handbook of Evidence-Based Mental Health Practice with Sexual and Gender Minorities offers a comprehensive array of evidence-based approaches for treating sexual and gender minority clients' mental health concerns. The interventions detailed here span a diverse spectrum of populations, including sexual and gender minority youth, transgender populations, same-sex couples, sexual minority parents, and bisexual individuals. Chapters also address numerous mental and behavioral health problems, including anxiety disorders, depression, substance abuse, trauma, body image disturbance, and sexual health. In addition to an overview of the research evidence supporting each clinical presentation and approach, chapters contain practical how-to guidance for therapists to use in their clinical practice. This book reflects a true integration of the best of sexual and gender minority research and the best of evidence-based practice research, presented by the leading experts in the field. As such it is essential reading for mental health professionals who work with these groups, as well as trainees in social work, counseling, and clinical psychology.

Family Violence-Cliff Roberson 2016-08-04 Family Violence: Legal, Medical, and Social Perspectives examines the entire spectrum of family violence, focusing on social processes and social relationships. The eighth edition is a multidisciplinary introduction to the study of domestic violence that guides readers to a better understanding of the challenges involved in reducing or eliminating violence. The new edition includes more information on PTSD and head trauma, a new section in children witnessing domestic violence, more international perspectives, which allow students to understand that family violence crosses borders and cultures, and a series of Promising Practices boxes that bring professional knowledge and accomplishments into the classroom.

The Therapist's Notebook for Lesbian, Gay, and Bisexual Clients-Joy S. Whitman 2013-12-19 Most therapy is set up in a heterosexist context. Explore the issues facing your gay, lesbian, and bisexual clients--and how to deal with them! The Therapist's Notebook for Lesbian, Gay, and Bisexual Clients offers therapists treating lesbian, gay, and bisexual clients

innovative, practical interventions plus homework and hands-on activities tailored to these populations. Use the notebook to explore the issues surrounding coming out, homophobia in the workplace, spirituality, identity formation, and issues that require a non-heterosexist approach, such as domestic violence and relationship concerns. Grounded in current theory, each chapter explains the rationale for the activity it proposes, includes contraindications, and provides a list of helpful resources for therapists and clients. Here are just a few of the issues this extraordinary book explores in its four thoughtfully planned sections: Section I: Homework, Handouts, and Activities for Coming Out and Managing Homophobia and Heterosexism addresses: conflicts in self-perceptions obstacles to the growth of a healthy GLB identity dealing with the trauma and anxiety that result from discrimination using semi-hypnotic visualization to treat internalized homophobia helping bisexuals decide whether to come out or to "pass" coping with internalized homophobic messages dealing with heterosexism in the workplace or at school Section II: Homework, Handouts, and Activities for Relationship Issues will help you and your clients understand and work on issues involving: choosing the right partner intimacy and gender roles financial stability assimilation, queer pride, and everything in between how ethnicity and coupling impact sexual identity negotiating a healthy open relationship sexual concerns, sexual dysfunction, and pleasuring sexual role values for bisexual and lesbian women Section III: Homework, Handouts, and Activities for Gender, Ethnic, and Sexual Identity Issues addresses "who am I" issues: sexual orientation and gender identity the intersection of sexual and ethnic identity oppression on multiple fronts gender exploration for lesbians Section IV: Homework, Handouts, and Activities for Specific Issues tackles concepts including: enhancing resilience through spirituality reconciling with religion spiritual wellness and the spiritual autobiography body image disturbances unwanted sexual behavior creating a safety plan in case of same-sex domestic violence alienation and finding a caring community medication adherence for HIV+ clients the difficulties faced by coupled lesbians with children family care planning addiction and recovery healing from the wounds of homophobia relationships with ex-partners managing workplace stress If you're new to treating lesbian, gay, and bisexual clients you'll find rich material, based in current literature, to guide your work. If you've already worked extensively with LGBT clients, the activities and fresh, innovative strategies in The Therapist's Notebook for Lesbian, Gay, and Bisexual Clients will expand and invigorate your skills.

Lesbians, Gays, & the Empowerment Perspective-Carol Thorpe Tully 2000 The author offers practical applications for the social worker and client at the micro-, mezzo-, and macro-levels. Eye-opening case studies are provided for each age group and cover everything from defining problems, identifying the underlying issues causing them, understanding the role of homophobia, and the application of the empowerment perspective.

Lesbian Family Life, Like the Fingers of a Hand-Valory Mitchell 2013-09-13 In this book, an array of approaches - first person and theoretical accounts, clinical understandings, qualitative and quantitative research - are brought to bear on controversial or under-discussed topics in lesbian family life. From conception all the way to care for elderly parents, this book takes a fresh look at lesbian family relationships. Topics include: butch/femme couples, infidelity, the psychological meaning of family for lesbians, age-discrepant couples, lesbian nuns as family, Listservs as family, intentional family for aging women, women raising sons, mothers who come out late in life, mothers and children in situations of domestic violence, lack of support for lesbian domestic violence survivors, death of a partner, psychological issues in the use of sperm donors or surrogates, and middle-aged lesbians caring for homophobic elderly parents. Some authors use self psychology and Jungian psychology to describe aspects of family life. The richness and diversity of topics makes it a text on "lesbian lives". Therapists and academics from throughout the U.S. have contributed to this collection. Many lesbian women, as well as teachers (it can be a text) and mental health professionals who work with children, families, couples and elderly will find useful material here. This book was published as a special issue of the Journal of Lesbian Studies.

Encyclopedia of Family Health-Martha Craft-Rosenberg 2011-01-20 Request a FREE 30-day online trial to this title at www.sagepub.com/freetrial What is unique about the process in the discussion of healthcare and interventions to use when working with families? What assessment tools provide guidance for healthcare providers as they determine interventions for families in their care? What are the changing dimensions of contemporary family life, and what impact do those dimensions have on health promotion for families? How is family healthcare changing in terms of practices, delivery systems, costs and insurance coverage? Students are able to explore these questions and more in the Encyclopedia of Family Health. Approximately 350 signed articles written by experts from such varied fields as health and nursing, social and behavioral sciences, and policy provide authoritative, cross-disciplinary coverage. Entries examine theory, research and policy as they relate to family practice in a manner that is accessible and jargon-free. From 'Adolescent Suicide' and 'Alternative Therapies' to 'Visitation during Hospitalization' and 'Weight Problems and Genetics', this work provides coverage of a variety of issues within a family context. The Encyclopedia of Family Health provides a comprehensive summary of theory, research, practice, and policy on family health and wellness promotion for students and researchers.

Perspectives on Behavioural Interventions in Palliative and End-of-Life Care-Rebecca S Allen 2018-06-12 The challenges faced by individuals and families at the end of life are still incredibly diverse, and many behavioural interventions and clinical approaches have been developed to address this great diversity of experiences in the face of dying and death, helping providers to care for their clients. Perspectives on Behavioural Interventions in Palliative and End-of-Life Care is an accessible resource that collates and explores interventions that can be used to address a wide range of behavioural, psychological, social and spiritual issues that arise when people are facing advanced chronic or life-limiting illness. With perspectives from experienced clinicians, providers, and caregivers from around the world, this book offers a strong foundation in contemporary evidence-based practice alongside seasoned practice insights from the field. Its chapters explore: Interventions to enhance communication and decision making The management of physical and mental health symptoms Meaning-Centred Psychotherapy for cancer patients Dignity Therapy Interventions embracing cultural diversity and intersectionality. Together with Perspectives on Palliative and End-of-Life Care: Disease, Social and Cultural Context, the book provides a foundation for collaborative international and interprofessional work by providing state-of science information on behavioural interventions addressing mental health and wellness. It is of interest to academics, researchers and postgraduates in the fields of mental health, medicine, psychology and social work, and is essential reading for healthcare providers and trainees from psychosocial and palliative medicine, social work and nursing.

Working with Adolescents-Julie Anne Laser 2011-03-03 This book has been replaced by

Social Work Practice with Lesbian, Gay, Bisexual, and Transgender People-Gerald P. Mallon 2009-06-02 A new, more comprehensive edition of the classic Social Work text Although the vast majority of LGBT persons are healthy, resilient, and hardy individuals who do not seek social work intervention, some have been or will be clients in social work agencies. Social Work Practice with Lesbian, Gay, Bisexual, and Transgender People is the updated classic text that has expanded its scope to include new content on practice with bisexual and transgender populations—and incorporated this content throughout. This informative book provides a knowledge base of practice that will better prepare students and practitioners for working sensitively, competently, and effectively with LGBT individuals. The text now covers content on LGBT populations as articulated by the National Association of Social Workers (NASW) and the Council on Social Work Education (CSWE). Comprehensive and practical, this unique text discusses the pragmatic aspects of social work with lesbian, gay, bisexual, and transgender people. It will improve and reinforce competent practice with LGBT persons and their families in multiple settings. Chapters focus on important topics such as: the profession's core values and ethical principles identifying, analyzing, and resolving ethically challenging practice problems LGBT persons of color—heterosexism, racism, and sexism applying the life model and the stress-coping process the root of conflicts in allegiances and pressures for unity via homogeneity practice with bisexual, transgender, and gender non-conforming persons sexual conversion therapy traditional psychoanalytic notions of lesbian couples the impact of sexual abuse on lesbian couples internalized homophobia, heterocentrism, and gay identity group work practice with the LGBTQ community clinical assessment for families where sexual orientation is an issue LGBT parenting the role of health care and many more! Complete with a highly detailed appendix of symbols, definitions, and terms, Social Work Practice with Lesbian, Gay, Bisexual, and Transgender People, is an invaluable resource for social workers and mental health professionals as well as for students and educators at all levels of experience.

Sorensen and Luckmann's Basic Nursing-Verolyn Bolander 1994 Now expanded to incorporate nursing and health related professionals, this 2nd edition provides you with the best possible definitions and explanations of the language of health care used in Australia today. In addition, the appendices include valuable information such as: Commonly Used Combining Forms, Tables of Normal Values, Drugs and their Control, and Useful Addresses for Nurses and Allied Health Professionals.

Theory & Practice in Clinical Social Work-Jerrold R. Brandell 2010-02-16 Today's clinical social workers face a spectrum of social issues and problems of a scope and severity hardly imagined just a few years ago and an ever-widening domain of responsibility to overcome them. Theory and Practice in Clinical Social Work is the authoritative handbook for social work clinicians and graduate social work students, that keeps pace with rapid social changes and presents carefully devised methods, models, and techniques for responding to the needs of an increasingly diverse clientele. Following an overview of the principal frameworks for clinical practice, including systems theory, behavioral and cognitive theories, psychoanalytic theory, and neurobiological theory, the book goes on to present the major social crises, problems, and new populations the social work clinician confronts each day. Theory and Practice in Clinical Social Work includes 29 original chapters, many with carefully crafted and detailed clinical illustrations, by leading social work scholars and master clinicians who represent the widest variety of clinical orientations and specializations. Collectively, these leading authors have treated nearly every conceivable clinical population, in virtually every practice context, using a full array of treatment approaches and modalities. Included in this volume are chapters on practice with adults and children, clinical social work with adolescents, family therapy, and children's treatment groups; other chapters focus on social work with communities affected by disasters and terrorism, clinical case management, cross-cultural clinical practice, psychopharmacology, practice with older adults, and mourning and loss. The extraordinary breadth of coverage will make this book an essential source of information for students in advanced practice courses and practicing social workers alike.

Family Policy-Shirley L. Zimmerman 2001-05-24 The latest work from respected family policy expert Shirley Zimmerman. Family Policy offers the only single-authored reference book to provide a comprehensive and coherent introduction to the topic. The author clearly and cogently guides students through the foundations, policy frameworks, and implications of policy decisions for family well-being, ending with a carefully considered set of conclusions and implications for policy practice.

Children of Substance-Abusing Parents-Shulamith Lala Ashenberg Straussner, PhD, CAS 2011-05-10 "Children of Substance-Abusing Parents: Dynamics and Treatment" is a necessary reference for all mental health professionals and students who need to understand and treat this population. It offers an invaluable look at treatment options and programmatic interventions across the life span and fills an important gap in the current literature. The

contributors include a wide range of experts who provide up-to-date evidence-based clinical and programmatic strategies for working with children of alcohol and other substance-abusing parents of any age and in almost any practice setting. This highly recommended book is a valuable resource for all practitioners and students concerned about this very large, but often hidden group of individuals and families." From the Foreword by Sis Wenger President/CEO National Association for Children of Alcoholics Parental drug abuse and alcoholism have an enormously detrimental impact on children and adolescents. Children whose parents suffer from drug abuse or alcoholism often face multiple physical, mental, and behavioral issues. They are at a greater risk for depression, anxiety, low self esteem, and addiction, and also are known to have poor school attendance, difficulty concentrating, and lower IQ scores. This book offers health care practitioners proactive programs and innovative strategies to use with this vulnerable population. Taking a comprehensive, life course approach, the authors discuss the implications and interventions at the prenatal stage, through childhood, adolescence, young adulthood, and adulthood. With this book, social workers and health care practitioners can help assess and intervene with children of substance abusing parents. Key topics: Dynamics in families with substance abusing parents and treatment implications Issues across the life span of children of substance abusing parents Prevention and early intervention programs for pregnant women who abuse substances Programs for young children, adolescents, college students, and children with incarcerated parents

Teaching Exceptional Children-Mojdeh Bayat 2016-11-10 Teaching Exceptional Children is an ideal textbook for introductory graduate and undergraduate courses on early childhood special education and teaching in inclusive classrooms. Bayat's clear and accessible writing, a visually appealing design, and focused pedagogy in each chapter help make it possible to cover a significant amount of material. This powerful text identifies specific behavioral characteristics and presents theoretical information grounded in neuroscience and child development research for a wide range of disabilities. Research-based best practices for effectively working with children with various disabilities in inclusive classrooms are provided in each chapter. The second edition has been fully updated based on the DSM-5, and includes new sections on contemporary issues in inclusion of children with disabilities in early childhood classrooms, such as challenging behaviors, using technology, at-risk children, promoting mental health, and family issues. A robust pedagogical program, along with online resources for instructors and students, provides full support, including: Chapter Objectives and Key Terms help frame each chapter Discussion, Critical Thinking, Essay/Short Answer, and Review Questions at the beginning, throughout, and concluding chapters prompt students to fully engage with the material Homework/Field Assignments provide opportunities for students to apply their knowledge to real-world situations Real-Life Vignettes illustrate concepts in action Color Photos, Figures, and Tables clarify concepts in a visually engaging way Recommended Resources and References offer guidance for further study The companion website, <http://routledgegettextbooks.com/textbooks/9781138802209>, includes instructor resources for teaching and planning, including an Instructor's Manual with additional ideas for assignments and projects, web links, and video links with reflection questions; a test bank; and PowerPoint lecture slides. The site also includes tools for students to engage with and master the concepts and terminology introduced in the book.

Prenatal Family Dynamics-Regina Kuersten-Hogan 2021-02-01 This book examines family interactions and relationships during the transition to parenthood. It offers a unique integration of different lines of research on prenatal family dynamics contributed by leading family researchers in North America and Europe who use observational approaches to study emergent family processes. The book explores prenatal dynamics in diverse families, including adolescent couples, same-sex couples, couples experiencing infertility, and couples expecting their second child. The introduction, anchored in family systems and structural theories, provides an overview of challenges couples commonly experience during the transition to parenthood and details prenatal family processes that predict postpartum adjustment in families. This sets the stage for subsequent chapters by emphasizing unparalleled windows into prenatal family dynamics provided by direct observation. Initial chapters focus on predictors of prenatal interactions and partners' representations of parenthood. Subsequent chapters describe original research on prebirth couple interactions and the coparenting relationship emerging during pregnancy. The volume includes several studies that rely on innovative research designs using observations of simulated couple encounters with their newborn, represented by a life-sized infant doll. The book concludes with a review of recent prenatal intervention programs designed to improve interpersonal and coparenting relationships of married and unmarried couples. The volume offers recommendations for future research on prenatal family dynamics, including suggestions for methodological advances, exploration of prenatal risk factors, expansion of conceptual models to incorporate culturally-meaningful coparents besides mothers and fathers, and further focus on prenatal intervention programs. This book is an essential resource for researchers, clinicians and professionals, and graduate students in the fields of infant mental health/early child development, family studies, pediatrics, developmental psychology, public health, social work, and early childhood education.
